

3-year old children learning to play 2 to 3-note song on the xylophone

## **EARLY CHILDHOOD MUSIC CLASS**

Introducing music education for younger kids! It is never too early to bring children in touch with music. This program brings children and grown-ups together for fun and interactive games and activities emphasizing music and movement.

The lessons also contain basic fundamentals of music using Orff & Kodaly approaches; sufficed with Orff instruments & Kodaly materials and professional music teachers. This is a rare, fun and productive class, headed by Mrs. Shiela A. Jorales, a licensed music teacher and experienced music teacher for younger kids in a Montessori classroom as well as traditional classroom. Yes, there are many reasons why you should choose to enroll your child to her class. Besides being a Bachelor of Music graduate, she passed the Licensure Exam for Teachers and gained a lot of experiences with younger kids. And you know what's more awesome? She's a professional wedding singer and a pianist. She has a lot more to show to the kids - like playing the violin and guitar. And most importantly, she loves kids and kids love her. She's a perfect fit!

Most of all, this is a music school and all children are also exposed to different music instruments and playing musicians! Spend time with us!

## Music Groups

Each is a 45-minute session which includes singing, playing percussions and pitched percussions, sensorial activities, classical to techno music listening and appreciation and other fun-filled musical activities for emotional, physical, intellectual and speech development. Another 45-minute session is given to 3-6yo for non-formal to formal piano or violin group class. This added session is optional according to child's readiness.

- **Babies/Toddlers** - age 3 months to 12 months. Babies learn so much from sensorial activities. We help babies to become more responsive and manage their emotional states. And music activities make a big difference! *(30-45 minutes)*
- **Toddlers** - age 1 to 2 years old. This is where kids' language starts to develop. We give more musical activities for speech development. We develop his positive qualities and confidence. Music helps them grow with confidence. *(45 minutes)*
- **Pre-Kinder** – age 2.5 to 4 years old. These kids start to get bored. They look for more activities. They are more observant and active so more enriched music and movement activities are given to this group. They are introduced to playing simple melodies on pitched instruments like the xylophones and piano. Gives you the option to include **Music Plus** program, a non-formal learning on piano and/or violin. *(Choice of 45 minutes or 2 hours)*
- **Preschoolers** – age 4-6 years old. Kids this age will do more music theory lessons and start non-formal group singing and instrumental lessons, as to piano and violin. On some months, they sing some Broadway songs like "Annie" or the "Frozen" soundtracks and. Also, they explore more different music genres other than classical & Broadway like rap, r&b, rock to techno music. Gives you the option to include **Music Plus** program, a non-formal learning on piano and/or violin. *(Choice of 45 minutes or 2 hours)*
- **Mixed Age** – age 3 months to 7 years old. This mixed age class is developmentally appropriate and also allows siblings to enjoy class together. Younger children learn from older children while older ones develop empathy towards young ones. The purpose is to have fun-filled musical experience together with grown-ups and develop social skills,

forming friendships to a family of music makers. Gives you the option to include **Music Plus** program, a non-formal learning on piano and/or violin. (*Choice of 45 minutes or 2 hours*)

- **Music Plus Program**

This is an additional session to kids who shows interest or readiness to study in piano and/or violin. It is in a style of non-formal learning integrated with formal learning according to the child's readiness. There is an additional 45-minute group class in which every child takes turn in using the instrument. A 3-yo child can learn to play simple melodies and nursery rhymes on the piano. Our classroom is sufficed with 2 upright pianos and 2 keyboards for a group of 5 or 6 children. The parent may also opt to schedule the child for a formal and private individual lesson whenever they wish to. Since a parent/guardian is involved in the music class, they too, will learn the course the child is going through. Isn't that awesome? 😊

We also would like to recommend the Preschool Combo Class we made for the kids to boost their creativity. The Preschool Music & Arts Combo Class + Free Spielgabe/Free Play is available to 2.5 – 6 year old kids. Get to know more about this program by just going to the link below:
